

As a result of the Affordable Care Act, certain services at the student health center are now free of charge to students enrolled in the AU Student Health Insurance Plan. These include preventative care visits (including gynecological annual exams), immunizations, and birth control.

Students who are not covered by the AU plan may also receive these services free of charge from their insurance carrier. However, because we do not bill insurance, you will have to pay for the services at the student health center and seek reimbursement directly from your insurance carrier. The student health center can provide you with a receipt that you can submit to your insurance company.
